

About Us...

We at WM Polymers have been in the surfacing business for over 35 years, starting out as an installation company installing many types of resinous floor systems. We began installing rubber safety surfaces over 25 years ago and quickly discovered the pit falls and problems with the rubber systems being used at that time. Being formulators of resinous coatings, we immediately went to work to create a rubber system which would withstand the harsh outdoor environment. After years of research and development, in 1998 we were proud to introduce the first light stable ThermoPlastic rubber into the industry called Nu-Crete, later changed to Pebble-Flex.

We at WM Polymers, through advanced technologies are now proud to introduce our new, second generation of ThermoPlastic rubber called Flecks®. This state of the art rubber is the only true granulated ThermoPlastic rubber on the market today. The Flecks® systems consist of Play Flecks® using our patented cushion system, Water Flecks® for spray and water parks and Deck Flecks® for patios and pool decks.

The Flecks® systems have been developed to withstand fading, ultra violet (U.V.) degradation and are extremely chlorine resistant. We also recently introduced EnviroFluff®, our newly patented seamless cushion base that is designed to withstand the outdoors with no harmful effects to children and the environment.

We are proudly committed to offering the best, safest and most environmentally friendly safety surfacing products in the industry today.

William H. McGrath, Jr.

WATER

Our Water Flecks® system is comprised of a U.V. resistant Thermo-Plastic rubber mixed with a two-part aliphatic chlorine resistant urethane designed to withstand long-term exposure in chlorinated water.

Water Flecks® system is installed as a seamless safety rubber system alone over concrete or with our patented EnviroFlecks® system (proprietary foam with high energy absorbing qualities) as an underlayment to reduce the risk of injury. Due to its unique non-skid properties when wet, Water Flecks® is the ideal surface for wet play areas. Water Flecks® comes in 14 different colors to choose from with many custom design choices.

Key Benefits – Water Flecks® System

- Applied at an average 3/8" thickness
- Non-slip when wet
- Chlorine resistant
- Resistant to fungal attack
- Excellent U.V. Resistance
- Soft under foot
- Safety cushion base for added fall protection
- 100% recyclable
- Available in a variety of colors & unlimited blended patterns
- 3-year warranty

PLAY

Our Play Flecks® system is an innovative safety surface for all your Play Ground Surfacing needs. This new patented system is a combination of our granulated Flecks® Thermo-Plastic rubber as a wear course, combined with our EnviroFluff® cushion layer. EnviroFluff® is 100% recycled proprietary foam with high energy absorbing qualities. Play Flecks® is installed as a total seamless system. The Play Flecks® system offers the playground industry the only truly light stable granulated safety surface that will provide long-term compliance to ASTM F1292-13 (Standard Specification for Impact Attenuation of Surfacing Materials Within the Use Zone of Playground Equipment).

Key Benefits – Play Flecks® System

- Applied at various thicknesses to meet and/or exceed Critical Height Fall (CHF) requirements
- 100% resistance to U.V. degradation & fading
- Excellent slip-resistance, wet & dry
- Cooler underfoot 100% Recyclable
- Repairs easily
- Available in 14 colors & unlimited blended patterns
- 5-year warranty

Key Benefits - EnviroFluff® System

- Meets & exceeds ASTM F1292-13 (Impact Attenuation)
- Newly patented EnviroFluff® cushion with-stands environmental deterioration much better drop heights than traditional SBR Rubber.
- Not Harmful to Children & the Environment
- 100% Recyclable

DECK

Deck Flecks® is a highly U.V. resistant surface perfect for re-surfacing new or old, cracked concrete substrates. Our unique Thermo-Plastic rubber granules combined with our two-part urethane binder makes an excellent non-skid, decorative surface which will not fade or crack in all temperatures. Our Deck Flecks® system comes in 14 colors and may be blended to create unlimited patterns and designs. Deck Flecks® for an aesthetically pleasing surface for all pool decks, patios, and walkways providing a long-term solution to all your surfacing problems.

Key Benefits – Deck Flecks® System

- No costly demolition
- Applies over most substrates
- Levels uneven substrates
- Latex free
- 100% resistance to U.V. degradation & fading
- Excellent slip-resistance, wet & dry
- Cooler underfoot
- 100% Recyclable
- Repairs easily
- Available in 14 colors & unlimited blended patterns
