

# WATER FLECKS®

## WATER FLECKS®

3 Year Submerged Warranty,  
Fungal Resistant.

Our Water Flecks® System is comprised of a U.V. resistant Thermo-Plastic Rubber (TPR) mixed with a two-part aliphatic chlorine resistant urethane designed to withstand long-term exposure in chlorinated water.

Water Flecks® System is installed as a seamless safety rubber system alone over concrete or with our patented EnviroFluff® system (proprietary foam with high energy absorbing qualities) as an underlayment to reduce the risk of injury. Due to its unique non-skid properties when wet, Water Flecks® is the ideal surface for wet play areas.

## Key Benefits - WATER FLECKS® System

- Applied at an average 3/8" thickness
- Slip-resistant when wet
- Ability to create beautiful designs and logos
- Available in 15 colors & unlimited blended patterns
- Chlorine resistant
- Resistant to fungal, Mold and Mildew
- Excellent U.V. Resistance
- Soft under foot
- Safety cushion base for added fall protection
- 100% recyclable
- Easy to clean
- 3 year warranty
